

Empathy Map

Project: PocketSmart AI – Your Smart Budget & Recommendation Assistant

Target User

A user who wants useful recommendations for home planning, party planning or jewelry selection while considering a specific budget and personal requirements.

Empathy Map

Says	Thinks
"I want recommendations that fit my budget."	Which options are suitable for my budget? Which recommendations
Does	Feels
Enters budget and planning requirements.	Wonders if recommendations are relevant to their needs.

User Needs Identified

- Budget-based recommendations
- Simple input process
- Recommendations for multiple planning categories
- Ability to view recommendation history and details

Project Response

PocketSmart AI addresses these needs through Home Planner, Party Planner and Jewelry Planner modules, AI-generated recommendations, recommendation history and recommendation details.
